OBJECTIVE

Enthusiastic and highly motivated software developer with hands-on experience in a diverse range of technologies, including React, next.js, Angular, C#, ASP.NET, and more. Seeking an employment opportunity to leverage my skills and passion for software development in a professional environment. Committed to continuous learning and eager to contribute to innovative projects while gaining valuable industry experience.

SKILLS

- **Programming language:** JavaScript, NodeJs, Express, MongoDb, React, C#, ASP.NET, SQL Database,
- **Other Technologies:** Next.js, Angular SQL & PL/SQL, Azure, AWS, Linux
- **Soft Skills:** Communication, Analytical, Presentations, Documentation, Motivation, negotiating and conflict resolution skills.
- Excellent customer service skills
- Secure coding practices

EDUCATION

- Bells University of Technology, Ota, Ogun State   **(Sep 2012 - Nov 2017)**
  Bachelor of Engineering in Electrical/Electronic Engineering (First Class Honors)
- ZERO TO MASTERY ACADEMY – The Complete Web Developer in 2023.

WORK EXPERIENCE

FrontDoor Project (September 2023 - Present)
*Role: **Frontend Developer***

- Played a pivotal role in building the Referrer Dashboard and Candidate Management Page within the FrontDoor project, contributing to enhancing the recruitment ecosystem.
- Contributed to improving the UI of the web app
- Designed and implemented features to streamline recruitment firm activities, reducing inefficiencies and boosting client satisfaction.
- Leveraged Web3 tools and technologies to address human coordination problems inherent in Web2, aiming for a more seamless collaboration within the recruitment industry.
- Actively participated in the beta-testing phase, seeking developmental partners' feedback to refine the application and improve its functionalities.

Upwork - MeetYourAI Organization - AIProf Project (August 2023 – Present)
*Role: **AI Developer***
- Integrated the Text-to-Image feature from the Google Cloud API into the AIProf project, enriching its capabilities and expanding the range of AI-powered functionalities.
- Implemented Text-to-Audio features within the AIProf project, broadening its utility and enhancing user experiences.
- Authored and published a blog post, sharing insights, discoveries, or experiences related to AI, likely focused on the AIProf project or a related area.
- Significantly enhanced the user interface (UI) of the AIProf website, providing a more intuitive and visually appealing platform for users.
- Contributed to a video AI project, possibly in collaboration with or as an extension of the AIProf initiative, further diversifying skills and experiences within AI technologies.

Habitum - (Hackathon Project) (July – Aug 2023)
*Role: **Frontend Developer***
Team: Habitum_Rocks

- Developed the front-end components utilizing Angular framework, Tailwind CSS, wagmi, and ethers.js.
- Contributed to the creation and implementation of the project's demo-site showcasing the functionalities and user interface.
- Collaborated with the Habitum_Rocks team to ensure seamless integration and interactive user experience.
- Showcased the project on GitHub, sharing the codebase for transparency and potential collaboration.

Maxfront Technologies
Frontend Developer (Contract)   **June 2023**
- Rejoined Maxfront on a short-term contract to contribute to the Host-Comply project
- Collaborated with the team to contribute to building the Admin dashboard using Angular, typescript, tailwind CSS, JavaScript and other technologies.
- Conducted bug fixes and performance testing on the product.
- Although the project was not completed during my time, I made valuable contributions.

Frontend Developer (Remote)   **(Sep 2022 – Nov 2022)**

- Collaborated with the software development team to contribute to building the Renderquiz application project with Angular and dotnet.
- Contributed to work on authentication – the signup page, login, forgot-password, reset-password, etc.
- Gained experience in HTML, CSS, JavaScript, Angular, dotnet and the use of various toolkits.

Oxygen – Access Bank Holdings' Subsidiaries (Feb 2023 – Present)
Application Support

- Designed and developed a suite of 45 responsive email templates for customer engagement during pivotal moments.
- Created comprehensive API flow architectural diagram for improved team communication and accelerated development cycles.
- Played key role in bug identification, resulting in a 20% decrease in reported issues and heightened user experience.
- Orchestrated seamless integration of Mixpanel analytics for comprehensive event tracking and user journey mapping.
- Proactively resolved application downtime incidents, ensuring uninterrupted user experience through collaborative troubleshooting.

UBA Group
Application Support Analyst   (Feb 2022 – Feb 2023)
- Provide second level support to users of existing applications and resolved bugs.
- Participated in code writing, debugging, revamping and deployment of applications.
- Assisted in the development of new features and maintenance of internal applications.

Part-Time Volunteer Work:
Freelance - Software Developer   (July 2022 – Feb 2023)
- Actively contributed to open-source projects as a software developer during my off-hours.
- Collaborated with a diverse community of developers on projects related to web development such as an Issue Tracking API, Bank Transaction Passbook, etc.
- Gained hands-on experience in HTML, CSS, JavaScript, C#, ASP.NET, Git.
- Learned and applied best practices in software development, code collaboration, and version control.
- Contributed to improving the functionality and reliability of open-source projects that were not directly related to my full-time job.

Fidelity Bank Plc – Application support Engineer   (Aug 2019 - Feb 2022)
- Contributed to building a loan origination solution portal
- Provided support for existing applications and fixed bugs.

Part-Time Volunteer Work:

Freelance - Web Developer   **(Aug 2019 – Feb 2022)**
- Took initiative to work on projects collaborating with senior developers, contributed to open-source projects.
- Skillfully managed and maintained databases, optimizing data integrity.

Freelance - Web Developer   **(Jan 2019 – Jul 2019)**
- Developed a single-page CV prototype and deployed the web app.
- Contributed to open-source projects.

CERTIFICATIONS
- ZERO TO MASTERY ACADEMY – The Complete Web Developer in 2023
- Introduction to Kubernetes (Mar 2023)
- C# (Basic) – HackerRank (Nov 2022)
- Udemy – Learning C# by building applications (Sep 2022)
- Microsoft Azure Fundamentals (Apr 2022)
- ITIL Foundation Certificate in IT Service Management (2021)
- HTML, CSS, and JavaScript: The Big Picture (Sep 2019)

PROFESSIONAL SUMMARY
Dedicated and aspiring software developer with an aptitude for learning and a passion for creating efficient and innovative solutions. Seeking an opportunity to apply my skills, collaborate with a dynamic team, and contribute to impactful projects within the software development industry.
